COFFEE

There's plenty of ways to experience coffee here at ONA coffee house. The menu below should assist you in discovering which best suits you.

Milk Based Coffee \$3.5

➤ Chocolate:

Black Betty boasts smooth chocolate and caramel sweetness and is purposely suited for milk based coffee.

➤ Berries:

The Founder boasts sweet berries with a hint of rich chocolate, reminiscent of a decadent black forest cake.

Iced Latte \$4.5

Two shots of espresso and milk served on ice.

Black Espresso \$3.5

Made with single origin coffee through the espresso machine and without the addition of milk.

***Note:** our single origin coffee changes every two weeks so our customers can get a real coffee experience. **Ask our friendly wait staff for current varieties.**

- Espresso
- Long black
- Iced long black
- Milk based? (some varieties work with milk, and some don't. See staff for details)

Cascara Soda \$7

"Ginga Ninja" is a refreshing cascara and ginger based drink, but watch out, the high levels of caffeine will sneak up on you!!

Filter Coffee \$7

There's more ways of extracting coffee than through an espresso machine. Filter coffee is strained through a filter resulting in a lighter cleaner extraction. We currently favour the V60 pour over.

Cold Brew \$5

Full immersion of coffee and filtered water for 12 hours creates a different flavour profile to hot brewing methods. It produces an aromatic beverage that reminds us of iced tea. Heat is required to activate caffeine therefore this brew is naturally low in caffeine.

Batch Brew \$4.5

Batch Brew is black filter coffee that is steeped ahead of time so if you are after a filter coffee and are a rush or on the go, batch brew is for you.

DRINKS

Milkshakes / Thick Shakes

Salted caramel and pretzel.
White chocolate and raspberry.
