

At Ona we live by our values of innovation, excellence and community, with these values we aim to create a world of better and more sustainable coffee.

On **April 20th** we are making a price change in all our coffees to reflect the investments made by Ona in maintaining coffee excellence, collaborating in community projects with our coffee farm partners and the increased price on raw bean. Many of the coffees we purchase are now 40% more expensive than previous years and in some cases double, such as our Ethiopian range. These investments mean we can continue to positively impact the lives of our farming communities, pursue our vision to build a sustainable future and bring truly exceptional coffees to you.

Thank you for being our partners on this journey and for choosing Ona.
